Education

2021 – 2022	**MSc Computer Science and Engineering, Instituto Superior Técnico**
	5 Master's Degree courses during exchange programme
2018 – 2022	**BSc Computer Science and Engineering, Delft University of Technology**
	GPA : 8.0
2015 – 2018	**International Baccalaureate, Vilnius Lyceum**

Work experience

2023 Jan – Present **System Administrator at Oxylabs**

Currently work as a System Administrator in the Scraper team at Oxylabs. In our team we manage around 1000 servers in total, including on-prem, bare-metal servers, as well as VM's and a few Kubernetes clusters. Doing multitudes of different tasks including solving server issues, responding to calls, writing CI/CD pipelines, scripting, automating tasks and introducing new technologies.

2019 May – 2024 May **Lead Full Stack Web Developer at TU Delft X**

Responsible for creating and maintaining projects related to TU Delft X's event booking systems. Created Live Gym Tracker. Rewrote the backend of the system to adapt to a new REST API. Maintaining both frontend and backend of the main site's Event Schedule, Event Display, Pricing and Information tabs, Live Gym Tracker. Later on, developed a BI solution and consulted engineers about the design of the system.

2021 Jun – 2021 Aug **Software Engineering Intern at Nasdaq**

Joined a team and worked on a real-life product being delivered to a foreign stock exchange. Built and tested Java backend validators, created frontend React components, debugged existing Java code and CI/CD pipelines. Participated in daily scrums, sprint plannings and retrospectives.

Project Experience

Fitness Tracker	Created a live gym tracker for TU Delft X's main website that allows users to see live data about current number of people in the gym as well as previous gym trends (Javascript)
Bilter Fubble	Created a music exploration game designed to encourage users to explore music beyond their preferred tastes. (Javascript)
Go Green	Created and deployed a fully fledged Java application designed to track and improve users' environmentally-friendly habits (Java)
